Machine Specifications

BASE MACHINE, 14MM TINE KIT.

The Claydon Straw Harrow creates a micro tilth in the top 30mm of soil, using the retained moisture for fast, even weed germination. It rakes out and destroys weeds at the cotyledon and one-leaf stage, removing a food source for slugs. Straw Harrows break up slug nests and desiccate their eggs by mixing up and exposing damp chaff and straw to sunlight.

This Machine will come with a minimum 6 months warranty either Manufacturers or TNS Assured
