Product Features

Autoglym Ultimate Screenwash

A high performing screenwash ensures a clear screen in all weather and driving conditions. Ultimate Screenwash is the perfect choice for all vehicle and wash jet types, including headlight washers. It shifts all common contaminants and will not freeze down to -45oC.

The bottle may appear small but 500ml makes up to 8 litres of screenwash and will easily cut through road grime, insect remains and anything else that may end up on your windscreen.

During the winter the dilution can be adjusted to suit falling temperatures whilst maintaining screen cleaning capabilities.

Autoglym Ultimate Screenwash is suitable for all wash jet types, as well as headlight wash units, safe on paintwork and trim.

Available for home delivery or FREE click and collect from any of our five branches.
