

TRIMBLE GREENSEEKER - HANDHELD CROP SENSOR

£571.33

Product Features

The Trimble GreenSeeker handheld crop sensor is an affordable, easy-to-use measurement device that can be used to assess the health — or vigor — of a crop in order to make better nutrient management decisions on your farm.

Use the GreenSeeker handheld to instantly take a reading of your crop's health. Readings can be used to make non-subjective decisions regarding the amount of fertilizer to be applied to your crop, resulting in more efficient use of fertilizer — a benefit to your bottom line and the environment.

Available for home delivery or FREE click and collect from any of our [five branches](#).
