

HONDA EU22I INVERTER GENERATOR

~~£1,390.00~~ **£1,295.00**

Product Type: **Petrol Generators**
Brand: **Honda**

Product Features

Power on the move with our **Honda EU22i Inverter Generator**

With a bigger GXR120 engine your electricity can follow wherever you go.

Due to their quiet nature you can use these handy generators anywhere. Ideal for caravanning and camping, it is able to provide clean, reliable electricity in the most extreme locations. We've built our handy generators out of light materials such as magnesium, so they're easy to transport meaning you don't need to waste your own energy carrying them.

With this model we've added a new "Fuel Valve Shutoff Position" which keeps the engine running without adding more petrol which allows you to burn off fuel in the carburettor. This ultimately means that the carburettor won't get damaged by stale fuel.

As well as a new front cover design and side logo, we've also added extra ventilation holes and a new long wear material and guard placed around the pull cord.

With its unique Inverter technology you are guaranteed smooth, uninterrupted electricity wherever you may be, so you're safe to plug in your laptop, or any other sensitive electronic equipment and be confident it won't get fried.

And just so you are extra confident in your purchase this generator is also Euro 5 compliant - an emissions standard which came into force January 2017.

Honda EU22i Inverter Generator Key Features:

Oil alert: This is a useful function that prevents damage to your engine by automatically shutting the unit down if oil drops below a safe operating level.

Lightweight: Not only are our generators easy to use, they're easy to transport and store, too. Because they're lightweight, they're easy to move around, whatever job you're doing.

Low noise: It's so quiet you'll hardly notice it's there. The noise-reducing muffler, casing and acoustic panelling greatly reduce the machine's operational noise.

Eco-throttle: This is a smart Honda technology that automatically adjusts the engine speed to precisely match the load. This saves fuel, extends engine life and contributes to quieter operation.

UNRIVALLED WARRANTY

Our products are built better to last longer. That's why we can offer you a rock-solid warranty for domestic and professional use on our core range products, covering both parts and labour. The warranty also maintains the same value throughout the warranty period – meaning the last day of cover is exactly the same as the first.

*Subject to domestic use and following the service schedule
