Product Features

Honda EU70iS Inverter Generator - Power on the move

Wherever you go your electricity can follow.

Due to their quiet nature you can use these generators anywhere. Ideal for caravanning and camping, they are able to provide clean, reliable electricity in the most extreme locations. We've built them out of light materials such as magnesium, so they're easy to transport meaning you don't need to waste your own energy carrying them.

There's nothing quite like a Honda Generator with its unique Inverter technology. This guarantees smooth, uninterrupted electricity wherever you may be, so you're safe to plug in your laptop, or any other sensitive electronic equipment and be confident it won't get fried.

NB: Plug design may vary dependent on country

HONDA EU70iS INVERTER GENERATOR KEY FEATURES

Oil Alert: This is a useful function that prevents damage to your engine by automatically shutting the unit down if oil drops below a safe operating level

Transport Wheels: Working on your own? A generator can be a tricky thing to move around. That's why we've added smooth and stable wheel attachments to allow one person to easily manoeuvre the unit.

Electric Start: Key Operated electric start for effortless operation

DC Output: DC Output gives you up to 12A for battery charging. (Please note, an optional cable is required).

Eco Throttle: This is a smart Honda technology that automatically adjusts the engine speed to precisely match the load. This saves fuel, extends engine life and contributes to quieter operation.

Anti Vibration System: Vibration can contribute to wear and tear on your machine. We've added straight engine rubber mounts to reduce mechanical stress on the entire unit

Low Noise: It's so quiet you'll hardly notice it's there. The noise-reducing muffler, casing and acoustic panelling greatly reduce the machine's operational noise.

UNRIVALLED WARRANTY

Our products are built better to last longer. That's why we can offer you a rock-solid warranty for domestic and professional use on our core range products, covering both parts and labour. The warranty also maintains the same value throughout the warranty period – meaning the last day of cover is exactly the same as the first.

*Subject to domestic use and following the service schedule
