

HONDA WB30 3" WATER PUMP

~~£630.00~~ £545.00

Product Type: **Water Pumps**
Brand: **Honda**

Product Features

Honda WB30 3" Water Pump

Water somehow manages to get everywhere and sometimes it feels like there's no escape. However, since our high flow rate pumps are especially designed to deal with large volumes of it which means any problem is quickly solved. They're robust, durable and powered by our commercial grade GX engine. They're equipped with a number of professional features, including the ability to deal with silt and sand meaning they're perfect for use on construction sites or for clearing floodwater.

Manufactured with an abrasion resistant cast iron volute and impeller, these high flow pumps have specially designed vanes for larger discharge capacity. This means they can move up to 1100 litres a minute - that's the capacity of an average-sized swimming pool in under an hour and a half. As well as their solid iron parts, these pumps use durable silicon carbide mechanical seals. Both of these features provide extra durability for handling water containing debris up to 6mm in size. There's even a strainer to ensure nothing bigger gets through.

NB: Hosepipe does not come included.

Honda WB30 3" Water Pump Key Features

Oil Alert: Prevents engine damage by automatically shutting the unit down if the oil drops below a safe operating level

Cast Iron Volute and Impeller: The cast-iron volute and impeller give you superior durability for long life performance, even when pumping abrasive silts

OHV-4 Stroke Engine: Powerful and efficient with trusted reliability. Easy starting in all conditions with automatic decompression to reduce the pull force required

Anti Vibration System: Vibration can contribute to wear and tear on your machine. We've added straight engine rubber mounts to reduce mechanical stress on the entire unit.

UNRIVALLED WARRANTY

Our products are built better to last longer. That's why we can offer you a rock-solid warranty for domestic and professional use on our core range products, covering both parts and labour. The warranty also maintains the same value throughout the warranty period – meaning the last day of cover is exactly the same as the first.

*Subject to domestic use and following the service schedule
