

# HONDA WT20 TRASH PUMP

~~£1,045.00~~ £955.00

Product Type: **Water Pumps**  
Brand: **Honda**

## Product Features

The prime choice when handling water filled with solids, the **Honda WT20 Trash Pump** is ideal for messy jobs and dirty water.

### Stomach of Iron

**On site or at lakes and rivers, water is often dirty and filled with silt. Our Trash pumps have been built strong to handle it.**

The ultimate choice for contractors or rental, our Honda WT20 Trash Pump has been specially designed to take on the most demanding jobs. They allow gravel and other debris to flow through the pump without clogging or causing damage – all whilst pushing out professional water pumping performance. So there's no need to worry about the water quality – just about getting the job done.

Built around durability, our Trash pumps feature a silicon carbide seal and a unique conical cast iron impeller design. They reduce wear from abrasive materials and can handle solid objects up to 31mm in diameter. There's even a strainer to ensure nothing bigger gets through.

Dealing with tough water conditions, occasionally our Trash pumps can become clogged – it can happen from time to time. To solve this problem, we designed a removable inspection cover that makes clearing debris quick and simple. If the pump becomes blocked (A), simply use the provided tool to loosen the quick-release bolts (B), and lift open the inspection cover (C) to remove any debris. Once it's done, it's back to work.

### Tough Build

**Come rain or shine, our OHV 4-stroke engines won't let you down. But especially come rain.**

As you'd expect from a Honda, our water pump engines are reliable and have low emissions – automatic decompression makes them so quick and easy to start. To keep everything in check, they also have an Oil Alert™. This prevents engine damage by automatically shutting the unit down if the oil drops below a safe level.

### A Watertight Warranty

**Like our water pumps, a Honda warranty is the best you can get.**

We work constantly to make the most reliable and effective water pumps out there. They're driven by powerful and efficient 4-stroke engines, and with mechanical seals and cast iron volutes and impellers, they're built to last.

### Made to match

Our water pumps just keep on going. That's why we can offer one of the most comprehensive warranties out there, too. It maintains the same value throughout the warranty period – meaning the last day of cover is exactly the same as the first.

Available for home delivery or FREE click and collect from any of our [five branches](#).
