Product Type: **Workshop Tools & Consumables**

Brand: **GreenChem**

Product Features

AdBlue 1000 Litre IBC from GreenChem

AdBlue 1000 litre IBC is a highly purified colourless liquid. It contains demineralized water and urea (32.5%).

What is AdBlue?

AdBlue is used with diesel engines using SCR technology. This technology (Selective Catalytic Reduction) reduces harmful emissions (NOx).

AdBlue is injected into the catalyst of the SCR system, where it triggers a chemical reaction with ammonia. This chemical reaction converts the toxic nitrogen oxides (NOx) into nitrogen (N2) and water vapour (H2O). Water vapour and nitrogen are naturally occurring gasses that are harmless to the environment.

Click and collect only

Buy online and collect your AdBlue 1000L IBC from your [nearest TNS Country Store](#).

*Please note that we can only accept empty IBC containers from the **GreenChem** company. When you collect your new IBC, you must exchange your old GreenChem 1000L container to avoid the £120 empty IBC deposit charge.

If you do not own an empty Greenchem 1000L IBC, please select 'deposit for the IBC container +£120 option'. Once the empty IBC container is returned, the deposit will be refunded.*
