

LASER STRIKE HANDHELD SILENT BIRD SCARER

~~£433.75~~ **£390.00**

Product Type: **Bird Scarers**
Brand: **Portek**

Product Features

With its advanced laser technology, Laser Strike is the ultimate silent bird scarer!

The Laser Strike Handheld Silent Bird Scarer uses optical quality precision lenses and components and has been specifically developed for use as a safe, effective and silent, bird scaring tool which is ideal for agricultural use in built-up areas and buildings where loud noises are a problem to livestock and the general public.

Laser Strike is designed to scare and clear birds at close range and at distances of up to 600m. It is most effective when used in low light conditions (*ie winter*) and at dawn and dusk when the birds are most active.

The Laser Strike has proved successful in a wide variety of situations against a large number of troublesome bird species. It is effective in arable locations, grain stores, cattle buildings, landfill sites and industrial installations. Frequent use of the Laser Strike will clear the most persistent and stubborn birds for long periods.

The Laser Strike Handheld Silent Bird Scarer is manufactured for professional use only (laser classification 3B). Not to be confused with cheap, inferior lasers that have low beam quality, but look the same!

Features

Large 100mW diode ensures effectiveness even on bright sunny days

Silent and highly effective against most species

Clear large areas in minutes

Tests show repeated use over 3-10 days substantially reduces or eliminate the target species

Occasional follow-up maybe required to maintain deterrent effect

Perfect close to built-up areas where noise complaints can be an issue
