

CHARGER 8.5 TON IMPACT LOG SPLITTER

~~£806.76~~ £675.00

Product Type: **Garden Tools**
Brand: **Portek**

Product Features

The Portek Charger 8.5 Ton Impact Log Splitter is the fastest on the market today with a powerful 8.5 ton impact.

The Charger is a super fast, powerful and portable machine, with a build quality you expect from Portek. With convenient handles, strong chassis and wheels, the Charger can easily be positioned on any flat ground, ready to start work.

Two large spinning flywheels, powered by a 1.5kw electric motor, drive the powerful ram with a force of 8.5 tonnes. The machine uses kinetic energy to hit your logs with high impact; cutting them quickly and safely.

For the release mechanism, 2 hands are needed. One to engage the drive mechanism, the other to release the ram. The ram springs back in no time at all, ready for the next log. The heavy duty, high density polymer guards ensures you are safe from the mechanics.

With a cycle time of under one second, this is truly the fastest log splitter you've ever seen. It works as fast as you do – no waiting around and no tiring crouching as with slow hydraulic machines.

Charger 8.5 Ton Impact Log Splitter Features

x10 faster than a hydraulic log splitter
Has a high impact force of 8.5 tonnes
Uses kinetic energy to split your logs - fast!
Can cut through tough, knotty wood
Portable and easily positioned

Specifications

Size:	1070 x 320 x 570mm
Power / Voltage:	1.5 KW / 220-240v
Log Capacity Max. Length:	400mm
Log Capacity Max. Diameter:	300mm
Max. Splitting Force:	8.5 Ton
Nett Weight:	73.0 Kg
