Product Features

Designed and developed to incorporate ALL the features requested by farmers over the past 32 years.

The Scatterbird Bird Scarer is the next generation of gas powered bird scarers. Like it's predecessor, this model is a sturdy, purpose built bird scaring gas gun designed specifically to meet the needs of the farmer. The Scatterbird range has for many years set the industry standard for durability.

The newly designed Scatterbird Bird Scarer incorporates many innovative features, including the use of UV stabilised, impact resistant polypropylene for the casing, and improved performance with the added feature of controlling the device by Bluetooth from an iOS or Android smart device. A superb all-weather piece of equipment, it provides excellent value for money and unique high performance.

To operate the machine you will require a 12 volt battery and a cylinder of propane gas (any size of propane cylinder is suitable for use). Use of an optional internal 12 volt battery (not included) is recommended to keep the wiring away from vermin and prevent flood damage to the battery and wiring.

The bird scarers plated steel legs included with the unit, raise it off the ground and allow the full force of the "BANG" to be heard with maximum effect.

It has the following features:

- Unique pin number prevents theft - can't be used by others
- Program your machine from the comfort of your home or office – then go to field to activate up to 20 metres
- Specific day to day programming of all features tailored to your requirements
- Choose start and finish times each day - app automatically displays sunrise and sunset each day
- Manage up to 300 machines with different programmes from one phone
- Select/programme individual days gun on or off
- Adjust the loudness of the bang for built-up areas
- Control your Scatterbird MK4 from your iOS or Android device
- Ergonomic carry design
