

STIHL FS94 C-E BRUSHCUTTER

~~£569.00~~ £465.00

Product Type: **Petrol Handheld**
Brand: **STIHL**

Product Features

Stihl FS94 C-E Brushcutter was built with user comfort in mind

Stihl FS94 C-E Brushcutter comes with a **2-stroke engine** with a stratified charge, offering a variety of benefits. The amount of **fuel lost during the charge cycle is reduced**, resulting in more power with a lower weight, **up to 20% less fuel consumption than normal 2-stroke engines** and significantly reduced exhaust emissions.

The bike handle that comes with this model enables a smooth mowing action when used in conjunction with a harness. You can easily guide the machine, making it perfect for use over large areas and **reducing operator fatigue**. Stihl's **ECOSPEED system** allows you to control the engine's speed individually on the operating handle, while the built-in anti-vibration system makes use over long periods much more comfortable and practical.

The starting process has been simplified in STIHL's latest machines, and this model also comes with their **ErgoStart system**. This cuts the effort necessary to start the tool by half, while the starter cord can be pulled at just a third of the normal force. Force peaks are smoothed so as to be virtually undetectable through the starter cord itself, and a manual fuel pump is in place to deliver fuel to the carburettor at the touch of a button, reducing the number of starting strokes required after breaks in operation.
