Product Features

Honda Izy HRG466 XB cordless mower

The new Honda Izy HRG466 XB is a **versatile, self-propelled lawn mower** that includes a 46cm cutter deck and Versamow® Selective mulching. This is the largest of the new cordless lawn mowers in the 'Izy-On' range.

Honda's Izy-On range has unrivalled performance, capable of **handling areas of up to 450m² on a single charge**. Recharging is fast and easy with one of Honda's quick-charging batteries. Delivering the sustained power and durability that serious gardeners require, it can keep going as long as you can.

Honda's first cordless lawnmower range absolutely rivals their petrol mowers. These lawnmowers are built with a durable steel frame, fully weatherproof and what's more, **low noise**.

We would recommend the 6Ah or the 9Ah battery* for this product.

DELIVERY
